Hi Cassidy,

I consulted with our Campus Landscape Architect, Claire, on the topic as well because she will be helping brew up ideas for Trumbo Plaza in the future. Below are our top three suggestions along with a reframing for two of the options:

Free Speech Element - What would Trumbo Plaza be like if it had Universal, Barrier-Free Design?

- Design of speaking stage in accordance with free speech organizations around the'
- Campus awareness plan - getting people aware of what the fountain is and why it's important
- Researching other BIG 10 schools free speech areas

Water Element - What if we looked at treating stormwater rather than a decorative fountain?

- Design of water element
- Student feedback
- Water sanitation cost analysis

Study plaza

- Design a study area
- Monitor desire paths so as not to interfere with walking – also consider barrier free design
- Design electrical setup so charging can happen
- Research best outdoor study space practices
- Design consideration for all seasons

Hope we didn't respond to late for your project!

Thanks,
stacy

# 3 Main Focuses

Fountain - Treating Stormwater

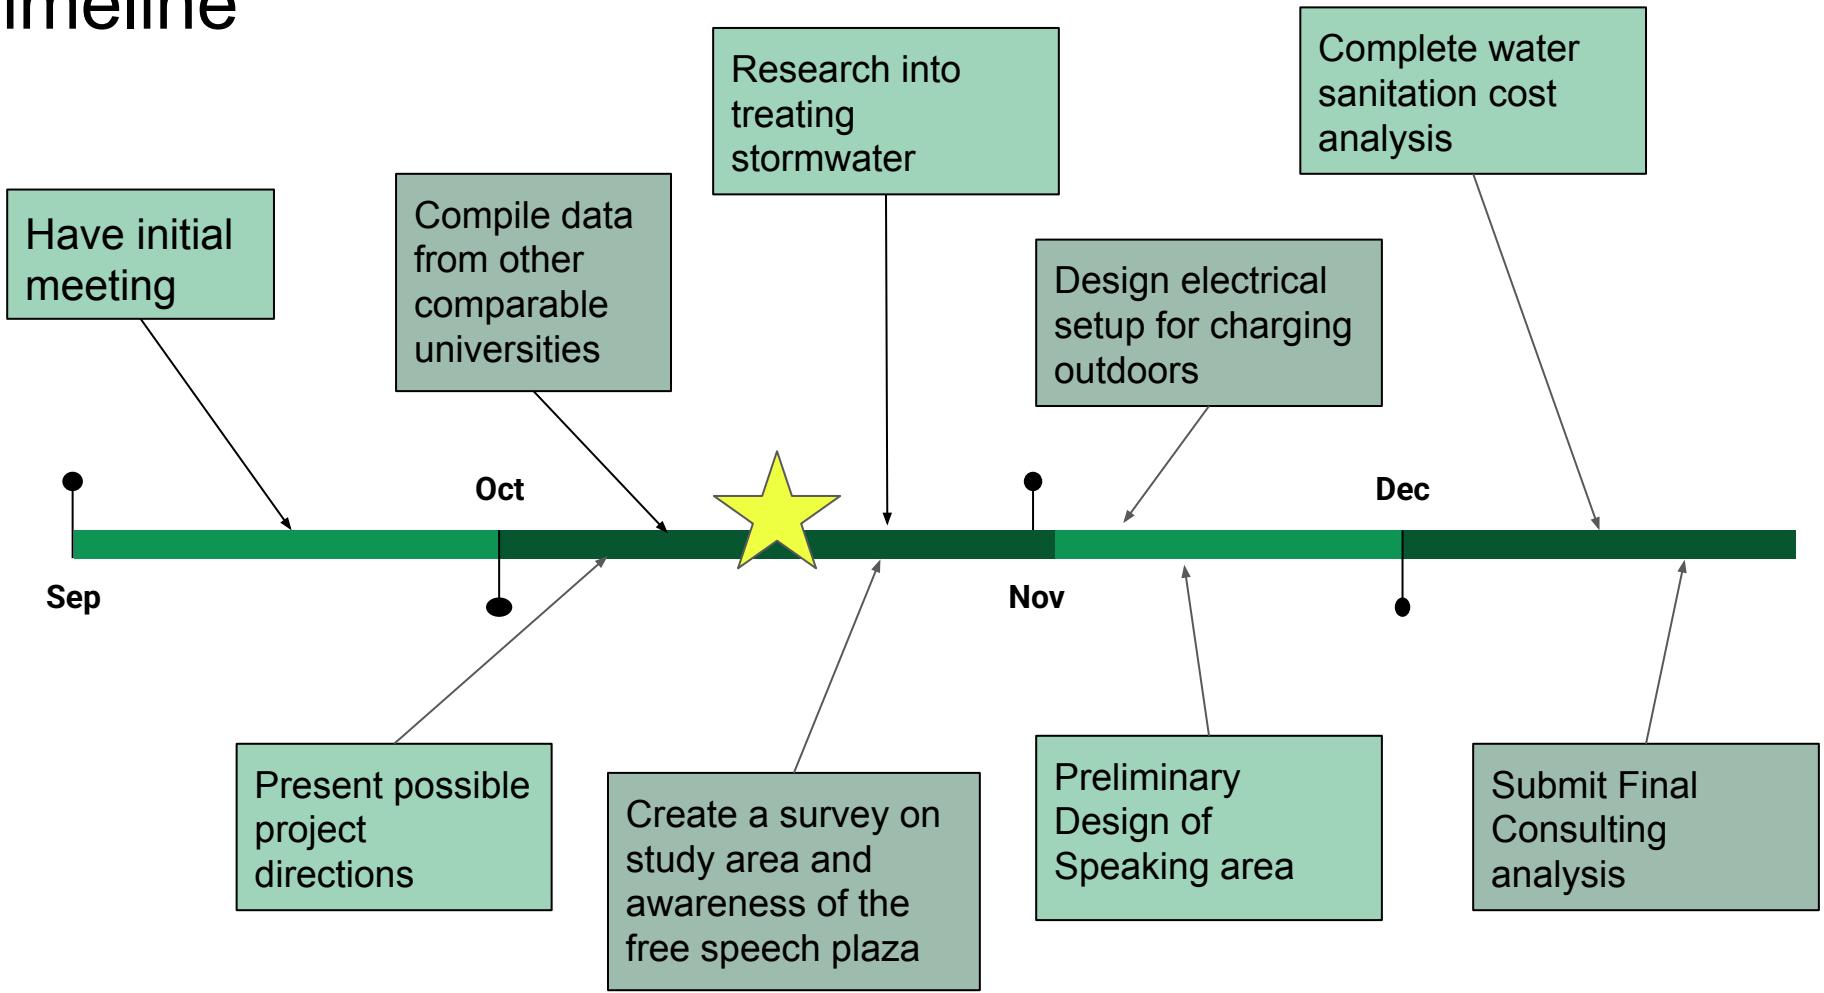

Free Speech

Study Space

# Timeline

Have initial meeting
Compile data from other comparable universities
Research into treating stormwater
Design electrical setup for charging outdoors
Complete water sanitation cost analysis
Sep
Oct
Nov
Dec
Present possible project directions
Create a survey on study area and awareness of the free speech plaza
Preliminary Design of Speaking area
Submit Final Consulting analysis
